Introduction

ManuTrak is an application used by Halliburton to develop and present high quality technical conference papers, technical journal articles, and related information to our customers. This application is for company use only.

For additional information about the technical paper processes, awards policies, and other technical paper information, see the Technical Paper Review Board web site at [internal address omitted].

Access to ManuTrak

ManuTrak is a web-deployed application. After users are granted access to ManuTrak by the Technical Publications group, they can access the application at [internal address omitted].

ManuTrak User Roles

All ManuTrak users are assigned roles, depending on the functions that they need for their work; the interface that the application displays varies in accordance with the assigned role. This manual provides information for the user role functions of ManuTrak.

ManuTrak uses seven defined user roles:

1. Author
2. Tech Writer
3. Approver
4. Marketing
5. Chair
6. Core
7. Admin

For questions about your user role or to set up your user role, contact your Technical Publications group:

- Houston - [internal address omitted]
- Duncan - [internal address omitted]
- Carrollton - [internal address omitted]

About this Manual

The ManuTrak User Guide is designed to serve as training material for new users and to provide reference for experienced users. It is structured around the user roles available in the application, and provides a step-by-step guide to the use of the application. New ManuTrak users should review the section of the manual that refers to their assigned role to become familiar with the screens within that function and with the types of information that they will need to complete these screens. The manual also includes documentation about several short-cuts available within the application, which may be helpful to all users.

This user guide uses several typographical conventions in the description of the application interface features and functions. Names of buttons and menu selections in the application are indicated in a bold font (**Save Author** button), screen names and tab names are indicated in a bold italic font (**New Abstract** screen), and field names are indicated in an italic font (*Classification* field).

The user guide also uses numbered steps to indicate actions performed by the user. The response of ManuTrak to those actions is included below the steps, but is not numbered. This convention should enable users to easily differentiate between their required actions and the response of the application.

Notes are also included throughout the manual where users may benefit from additional information or clarification about the types of entries needed. This content is located below the step associated with it, and is indicated as **Note:** [followed by additional information].
